Global Finance Names the World's Best Islamic Financial Institutions 2020

NEW YORK, March 13, 2020 – *Global Finance* has announced its thirteenth annual awards for the World's Best Islamic Financial Institutions. A full report on the selections will appear in *Global Finance's* World's Best Banks special issue in May, as well as online at GFMag.com. The winners of this year's awards are those firms that contributed to the growth of Islamic financing. They successfully met their customers' needs for Shariah-compliant products, while creating the foundation for continued growth and safety in the future, with modern and efficient delivery channels.

"Islamic finance continues to expand its market reach and introduce sophisticated products to meet current financial needs. Outside the Islamic world, however, the benefits of these funding vehicles remain little understood," says *Global Finance* publisher and editorial director Joseph Giarraputo. "These *Global Finance* awards give corporate professionals insight into the top Islamic institutions, showcasing those entities best able to serve clients in today's modern markets while still remaining grounded in eternal principles."

All selections were made by the *Global Finance* editorial team after extensive consultations with bankers, corporate finance executives and analysts throughout the world. Entry submissions from Islamic Financial Institutions were also considered. In selecting these top firms, factors that ranged from the quantitative objective to the informed subjective were considered. Quantitative criteria included growth in assets, profitability, geographic reach, strategic relationships, new business development and innovation in products. Among the subjective criteria considered were reputation, customer satisfaction and the opinions of analysts and others involved in the industry. The mix of these factors yields leading banks that may not be the largest, oldest or the most diversified in a given country, region or product, but rather the best—the firms with which customers around the world would most likely want to do business.
